Annie Bascoul's work, ***Blaise Pascal et les jardins*** (Blaise Pascal and Gardens), responds to the need for a new look at Pascal's work, his influence, the scope of his work and his affinities. In Pascal's footsteps, we follow the flowerbeds and other plant embroideries, discovering mathematical principles and theorems. Annie Bascoul's new work focuses on gardens, and in particular formal gardens. She wanted to highlight the symbiotic dimension between a researcher (Blaise Pascal) and 17th-century landscape gardeners, by creating art books with embossed pages and watercolour illustrations. ***Blaise Pascal et les jardins*** takes a fresh look at the Anthropocene's desire for man to dominate nature, which seems to call into question the necessary symbiosis between all "natural elements".

Annie Bascoul is a contemporary visual artist. She is an artist of international reputation. Her main sources of inspiration are nature, decorative arts and fine art.
