English version

Instructions
Claude Monet,
the Water Lily obsession

A VR 6DOF experience for Oculus and HTC Vive

Length: 8 minutes
Space required: standard 3x3m
User position: standing
One controller is occasionally needed

Specs required

- Processor Intel Core i7-7700 or equivalent
- Graphics card GTX 1070 or equivalent
- Hard drive SSD
- 16 Go RAM

Setup steps

1. Unzip the .zip file
2. Start Oculus or Vive on your computer (SteamVR is needed for the headset to communicate with the experience)
3. Place the headset on the viewer's head. If using Oculus, place the viewer towards the sensors for a better orientation
4. Double-click the file "Waterlilies.exe"
5. The experience can take some time to launch (about 15 seconds in black) before the ARTE logo appears.
Inside the experience

- At the beginning of the experience, 3 languages (French, English and German) are available. Choose a language aiming with the head. A little grey point in the middle of the screen help you to aim.
- The experience contains audio, don't forget to check if windows is playing the sound in the right device (Oculus or Vive).

- To go back at the beginning of the experience, connect a controller (the left one for Oculus) and push the menu button as showed below for Vive and Oculus.

- At the end of the credits, the game will return to the language menu.
- To close the experience, type "escape" or "Alt-F4".
